- Business incubators
- Chambers of commerce and other associations
- NGOs
- Technology transfer institutions, universities and research institutes
- Energy suppliers and management institutions
- Environmental facilities
- Education and training organizations
- Transport operators and infrastructure providers
- ... and other

Blue innovation

24,2
M€

12% of the total Programme ERDF budget

Specific Objective 1.1: Enhance the framework conditions for innovation in the relevant sectors of the blue economy within the cooperation area

Partners on this topic can collaborate for:

- Supporting creation of innovative processes, services and products, as well as eco-efficiency tools and solutions in the blue economy relevant sectors
- Innovation delivery through cross-border supply innovation chains in the smart specialization fields chosen by the regions participating in the Programme
- Strengthening and improving research and innovation skills and entrepreneurial capacities
- Enhancing the creation of sustainable linkages and synergies among innovation actors in the cross-border area, thus enabling the knowledge transfer and creation of new R&D initiatives
- Supporting actions aimed at improving the access to financing for R&D activities through trainings, information, awareness raising campaign

Safety and resilience

51,3
M€

25,5% the total Programme ERDF budget

Specific Objective 2.1: Improve the climate change monitoring and planning of adaptation measures tackling specific effects, in the cooperation area

Specific Objective 2.2: Increase the safety of the Programme area from natural and man-made disaster

Partners on this topic can collaborate for:

- Improving the climate change monitoring and planning of adaptation measures tackling specific effects in the cooperation area
- Strengthening the capacity of public sector to develop and implement innovative services, and financing schemes for increasing resilience to climate change
- Supporting risk management coordinated measures aimed at increasing the safety of the Programme area from natural and man-caused disasters
- Improving risk monitoring and development of disaster management systems
- Supporting initiatives for increasing awareness in risk management from natural and man-caused disasters

Environment and cultural heritage

70,5
M€

35% of the total Programme ERDF budget

Specific Objective 3.1: Make natural and cultural heritage a leverage for sustainable and more balanced territorial development

Specific Objective 3.2: Contribute to protect and restore biodiversity

Specific Objective 3.3: Improve the environmental quality conditions of the sea and coastal area by use of sustainable and innovative technologies and approaches

Partners on this topic can collaborate for:

- Developing and implementing innovative protection and promotion measures for sustainable and balanced use of natural and cultural resources
- Strengthening human capacities in the field of sustainable tourism, natural and cultural heritage awareness and valorization
- Developing of tools and models for integrated environmental management capacities aimed at protection natural resources
- Supporting the development of Programmes and strategies for common, sustainable and recognizable Adriatic products
- Supporting creation of innovative technologies in waste management and treatment, and implementation of small-scale innovative green technology actions

Maritime transport

43,3
M€

21,5% of the total Programme ERDF budget

Specific Objective 4.1: Improve the quality, safety and environmental sustainability of marine and coastal transport services and nodes by promoting multimodality in the Programme area

Partners on this topic can collaborate for:

- Enhancing the development of new traffic modalities that encourage environmentally-friendly solution and low carbon transport system
- Supporting actions for adoption of innovative ICT systems and electronic traffic management
- Strengthening quality management system for freight and passengers transport
- Supporting innovative tools and solutions for improving connectivity in the transport systems, quality and the environmental sustainability of services
